Objective — Passionate software engineer with a strong interest in learning and applying new technologies and frameworks. Skilled in problem-solving, writing efficient, high-quality code, and contributing to innovative projects. Seeking opportunities to enhance my professional development within a dynamic, collaborative team environment

Skills

Languages Python, JavaScript, PHP, Java, Scala	DevOps and Tools Docker, Microservices, Git (Version Control)
Web Dev HTML, CSS, React.js, Node.js, Express.js	AI and ML GANs, TensorFlow, Squeeze Attention U-Net
Backend FastAPI, Java Spring Boot, RESTful APIs	Soft Skills Proficient in French, English, and Arabic,
Databases MySQL, MongoDB, NoSQL	Excellent communication and teamwork skills

Experience

FREELANCER

2021 – Present

Full Stack Developer

Contributed to the development and execution of several significant projects, including:

- A kids' doctor system that automatically sends reminders for the vaccination appointment time.
- A reservation system and an admin dashboard for a hotel.
- A school system that is responsible for managing both their financial aspect and the data related to their students.

_Vois explore intern

Aug 2023 – Sep 2023

Backend Engineer

- Participated in sessions on Agile methodologies and Scrum practices.
- Shadowed teams in key meetings, including sprint planning, sprint review, and daily standups, gaining hands-on insight into team workflows.
- Collaborated on a team project, "Learning Hub," utilizing the Scrum framework and Spring Boot to build a collaborative learning platform.

Education

Helwan University, Cairo, Egypt

2020 – 2024

Bachelor of Computer Science and Artificial Intelligence

GPA: 3.55 ; Grade: Excellent with honor

Major: Computer Science

Minor: Information System

College De La Salle School, Cairo, Egypt

2006 – 2020

French High School Diploma

Grade: Excellent

Projects

E-Commerce

- Developed a full-stack E-Commerce application, including an admin dashboard for efficient product management and a seamless user experience.
- Built backend functionalities with Node.js and Express.js, utilizing a microservices architecture with Docker to ensure scalability and robustness.
- Implemented SQL (MySQL) and NoSQL (MongoDB) databases to manage data efficiently.
- Created frontend interfaces with React and Tailwind CSS, enabling the admin to add product categories and products while allowing customers to manage their carts and place orders.

Vodafone Learning Hub

Aug 2023 – Sep 2023

Contributed to the development of an e-learning platform through a rotational approach across essential functions:

- **Documentation:** Created comprehensive API documentation using OpenAPI, ensuring clarity and accessibility for developers.
- **Backend Development:** Built backend functionalities with Node.js and Express.js, leveraging a microservices architecture with Docker for scalability and robustness.
- **Testing:** Conducted rigorous testing using JUnit and Mockito to ensure backend reliability and functionality.
- **Implementation:** Developed core features with Java Spring Boot, SQLite, and Hibernate, while managing version control with GitHub.
- **Agile Methodology:** Actively participated in an Agile environment, contributing to sprint planning, reviews, and stand-ups, fostering collaboration and rapid iteration.
